OVER 90 PERCENT of Federal ESPCs.

OVER
385
DOE IDIQ
& ENABLE
projects
awarded
SINCE 1998

MORE THAN

\$12.1 
BILLION

in cumulative
energy cost savings

Every state has

**BENEFITED
FROM
AN ESPC** 

OVER

\$5.1 
BILLION

invested in
energy efficiency
and renewable
energy improvements

OVER

505 
TRILLION

BTU in life cycle
energy savings

Average length
of a contract

16.5 YEARS 

A typical **\$10 MILLION**
ESPC creates
95 JOBS 

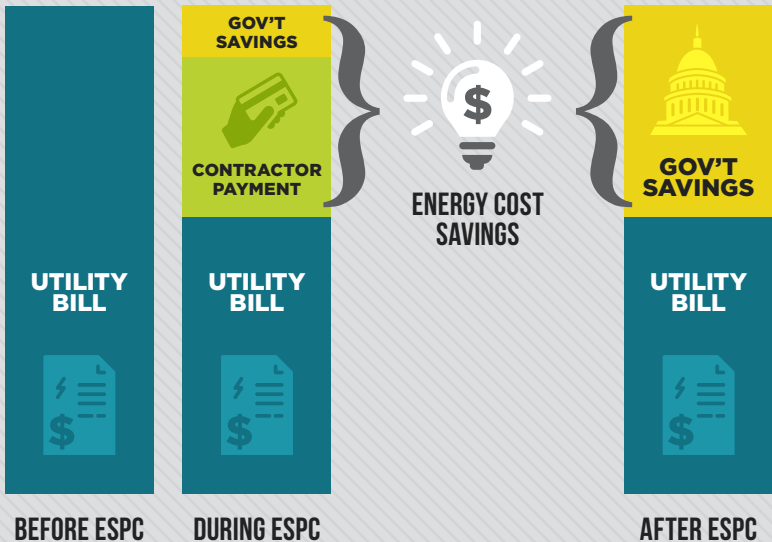

FPCC MEMBERS

AECOM | AMERESCO | CEG SOLUTIONS | CONSTELLATION | ENERGY SYSTEMS GROUP
HONEYWELL | JOHNSON CONTROLS | LOCKHEED MARTIN | NORESKO | SCHNEIDER ELECTRIC
SIEMENS | SOUTHLAND ENERGY | TRANE | WGL ENERGY

How do ESPCs work?

The ESPC contractor designs and installs solutions and equipment which together **reduce the energy consumption of a facility**. These energy savings are **guaranteed to occur by the contractor**.

The savings on the utility bills which occur as a result of implementing the ESPC are used to pay for the services and equipment installed. These payments occur over a stipulated period of time until the contract has been repaid.

SAVING ENERGY. SAVING MONEY. CREATING JOBS.
